Download optional software to start video call

Getting started with video calling

Your TENVEO VA1000 provides full HD 1080p video calling.

To begin your video calling experience both you and the person you call should use a video-calling application such as Skype, we chat, Microsoft Lync or Cisco Jabber.

Except for webcam and video calling application, each conference should meet:

- A computer with speakers (or a headset and a microphone; your VA1000 has two built-in microphones.
- A broadband Internet connection (e.g., DSL, T1, or cable)
- For full HD 1080p video calling please check your preferred video calling software requirements. (Requirements may vary between applications but usually a minimum of 2 megabit upload speed is required).
